

Eurobattery Minerals will attend MMH 2024 in Seville

MMH

**V Mining &
Minerals Hall
15-17 octubre 2024**

Mining and Minerals Hall (MMH) 2024 is one of Europe's premier mining industry events, taking place from October 15 to 17, 2024, at the Seville Exhibition and Conference Center (FIBES). Now in its fifth edition, MMH continues to cement its reputation as the continent's most important mining forum, gathering professionals, companies, and experts from around the globe.

This year's event will showcase cutting-edge innovations in every stage of the mining lifecycle, from exploration and extraction to production and mineral processing. Attendees will have the opportunity to discover the latest advancements in mining technologies, designed to enhance efficiency and minimize environmental impact. With a strong focus on sustainability, MMH 2024 will spotlight mining operations that are leaders in both technological excellence and environmental stewardship. These operations represent the industry's commitment to meeting the growing demand for raw materials in ways that respect natural ecosystems and local communities. Apart from ESG and SLO (Social Licence to Operate), the Critical Raw Materials Act (CRMA) from the European Commission will also be in focus.

The Swedish booth at MMH 2024 goes under the umbrella of the Spanish-Swedish Chamber of Commerce (CCHS). The Spanish-Swedish Chamber of Commerce is a private, independent, non-profit association that aims to promote commercial and cultural relations between Spain and Sweden. The CCHS, located in Madrid, was established in 1950. In addition to its headquarters, it has a network of delegates in the provinces of Valencia, Costa Blanca-Alicante, Costa del Sol-Malaga, Seville-Huelva, Basque Country, Mallorca and Sweden. The invited Guest Country this year at MMH is Sweden.

Eurobattery Minerals AB is a Swedish mining company listed on the Swedish Nordic Growth Market (BAT) and German Börse Stuttgart (EBM). Focused on responsible exploration and development of key battery minerals—nickel, cobalt, and copper—the company operates projects in Finland and Spain. With a vision to make Europe self-sufficient in ethically mined minerals, Eurobattery Minerals supports the European Union's green and digital transitions, contributing to a sustainable industrial future. The company aims to minimize supply-chain risks and help build a cleaner, more just world by providing traceable critical raw materials for electric vehicles, renewable energy, and other strategic industries.

You will be able to **meet Eurobattery Minerals** at the **Swedish stand (Pab 3; 3150-3151)** at MMH 2024. We will share the stand with the Spanish-Swedish Chamber of Commerce, Geosyntec Consultants, Axflow, Abbantia Law Firm, Raven Management, and Volvo Cars.
